

**QUEENS COLLEGE
DEPARTMENT OF MATHEMATICS**

STUDENT EVALUATION FALL 2015

Brown, James Math 619 (#1)

I enjoy the class and appreciate the way Prof. Brown breaks things down by giving relevant homework. Lectures are clear and organized. Prof is always available by email/in office to help with homework.

Overall Prof makes course challenging and interesting.

.....

Great Professor with high standards and expectations. I appreciate his humor and side comments on how difficult some of the proofs are. For example, he will let us know when we couldn't have come up with a proof on our own. So, in that way, he brings math down to earth! What I value the most about the class are the weekly problem sets. I feel like I've gotten stronger in my ability to comprehend and understand proofs. It's good practice. Thank you, Professor B!

.....

Prof. Jim Brown is an excellent and a very intelligent teacher (instructor). He is helpful in and outside of class. He is one of the best teacher to have if you're willing to do your part of the work.

.....

Jim Brown is a very thorough professor. His lectures are clear, concise, and well planned out. He devotes outside time to help his studentns succeed in his class and welcomes emails with any concerns.

We have homework that is due once a week, where we can work with a group and he gives help if needed. I would reccommend taking his class.

.....

He is a detail professor and really helpful. Students can freely ask any question in or out of class. He also explained every homework problem very detail. He correct our every single homework problems and also correct our grammar problems. he is really good professor and we can really learning a lot from him.

.....

Professor Jim Brown is extremely clear in his lectures. He answers any and all questions and encourages his students to ask whenever we are lost or confused. He is always available during his office hours and responds to every email sent to him, quickly and clearly. He also exhibits the skill to explain in multiple ways. I've enjoyed his class very much.

.....

I have definitely learned a lot in this class. The teacher demands a lot out of each student, but is always willing to help his students along the way. Moreover, This class will teach you not to procrastinate, be a smart aleck, or assume what you are trying to prove. For any student willing to nut in the work. I highly recommend this professor.
